SYSTEMS

Vertex Integrated ERP—Manage, Measure, Analyze Financial Performance

Built on the highly reliable Microsoft Dynamics NAV software platform, Vertex ERP (Enterprise Resource Planning) offers comprehensive accounting and finance performance for small and midsize agencies. Integrated with *Intuition by Vertex*, the combined solutions enable you to manage consumer services as well as operate the business side of the agency.

Available in either on-premises or hosted cloud configuration, Vertex ERP is available with core business features, including:

- Financial Management (general ledger and fixed assets)
- Supply Chain Management (sales, purchasing, and invoicing)
- Human Resource Management and Payroll
- Business Inventory Management

For agencies with sub-contract or prime manufacturing, an extended solution adds:

- Cost Accounting
- Project and Job Management
- Customer Relationship Management
- Warehouse Management
- Manufacturing Management

Eliminate Paper Timesheets with *Intuition Touch by Vertex*

Intuition Touch is designed for vocational programs as an effective way to automate timesheets. Once an entry for time tracking is complete, it can be electronically submitted to payroll for approval and processing.

- Payroll processors receive timesheets with the right job number and correct piece count.
- Easily record piece counts and time once.
- Enssure Department of Labor compliance and enforce section 14(c) regulations.

Workforce Management Suite: One Solution for Time + Attendance + Scheduling

Management and staff benefit from a single product combining time and attendance features with advanced scheduling services—a powerful and seamless solution for timekeeping and workforce management.

- Automate electronic leave requests, approvals, and the scheduling of staff.
- Combined schedule data and actual work hours provide insights for "planned v. actual" analysis.
- Scheduling adds features for dynamic, multi-shift schedules, employee preferences, and required skills.
