Client Payroll Manager

Eliminate pain points common to most financial software with advanced functionality

Solves the #1 pain point in the IDD space

What is Client Payroll Manager?

Our Client Payroll Manager is a powerful cloud-based tool that simplifies the processes of tracking earnings and productivity all while maintaining Department of Labor compliance. Client Payroll Manager streamlines processes for calculation of earnings under section 14(c) of the Fair Labor Standards Act while giving your staff a powerful tool they need to accurately track productivity, due dates for prevailing wage surveys, and time studies.

Once your team has calculated total hours and earnings, they can use any payroll application or Staff Payroll for withholdings and check printing. Our client payroll software meets DOL regulations for 14(c) participants while collecting, analyzing, and reporting client earnings and productivity.

How Client Payroll Manager Can Benefit You:

- Track prevailing wage rates and target dates for wage
- Calculate sick/personal time off pay benefits based on qualified hours of work or attendance
- Track hourly productivity ratings and automatically calculate average pay rates
- Calculate health and welfare earnings

What You Can Manage with Payroll Manager:

- Hourly rate sub-minimum wage payroll
- Productivity calculations
- Job labor costs
- WH-226A: Applications
- Source America (NISH) reporting
- Gross earnings calculations
- Benefit tracking
