

Time Simplicity

Simplify your IDD agency's scheduling process with our staff scheduling software

What is Time Simplicity?

Time Simplicity is your ticket to simplify the creation and management of complex schedules while accommodating employee preferences, required skills, labor law constraints, and much more. Integration with TimeWorksPlus gives a complete view of planned schedules versus actual time worked.

Beyond making scheduling easier for managers to oversee, it's important to understand that your employees will benefit from this staff scheduling software. Time Simplicity allows employees to access their schedule via the app on mobile devices anytime and anywhere. When schedule changes are made your whole team can receive notifications and view them on the app. Your team members can view their schedules, swap shifts, claim open shifts and offer shifts to fellow employees.

Eliminate most scheduling pain points
