

## TimeWorksPlus

---

TimeWorksPlus is a game-changing, cloud-based time and attendance software made for IDD agencies

### What is TimeWorksPlus?

---

Our time and attendance software is a complete timesheet system that enables your team to manage their schedule in real-time. You can track and record staff time, service delivery, attendance and accrual balances all within one timesheet software solution.

Agencies can use this timesheet software to streamline and automate leave time requests, limit early clock-ins, and issue overtime warnings to reduce time spent on scheduling and more time spending with clients. TimeWorksPlus uses geofencing, geocoding, and IP address tracking, to offer many ways to record time and access our timesheet software no matter where you are.

Perform the same time and attendance tasks within a couple of hours instead of a couple of days

### Benefits of TimeWorksPlus

---
