

## Vertex Payroll

---

Eliminate pain points common to most financial software by providing advanced functionality

## What is Vertex Payroll?

---

This payroll processing module for rehabilitation agencies' staff is designed to simplify payroll tasks and make payroll information available across your system. Vertex Payroll is configurable and flexible software that enables your team to define payroll processing steps to match your business model.

It includes a fundamental human resources module enabling rehabilitation agencies such as yours to efficiently direct and manage daily human resources processes. From hiring the appropriate team members and analyzing pertinent information to tracking absences and training, your agency can get the job done with minimal effort and maximum control.

Simplify payroll tasks and make payroll information available across your system
