Vocational Time Manager

Our consumer-employee time tracking software enables supervisors to electronically record granular work activities easily to increase the accuracy of calculating paid work

Eliminate 100% of back-office time sheet data entry

What is Vocational Time Manager?

This software is perfect for agencies that operate day and vocational programs and want to electronically track time for activities and paid work. Earnings for subminimum and piece-rate work are calculated using strict rules to guarantee accuracy.

The Vertex Vocational Time Manager is a tool that helps supervisors submit the correct time and earnings for their employees. This prevents errors and ensures that everyone is held accountable for their actions. With an automated employee time tracking software, errors can be avoided and resolved easier than ever before. Your team will gain time they now waste on fixing incorrect job numbers, missing piece counts and hours, and inaccurate earning extensions.

Benefits of Vocational Time Manager

- Securely Collect Data
- Electronically Record Times
- Provide Accessibility
- Enforce Accountability
- Avoid Errors
- Automate Earnings Calculation
