

# HOW CAN CASE MANAGER BY VERTEX TRANSFORM YOUR DAY-TO-DAY?

Track individual progress over time, stay organized & maintain compliance with our Case Manager software.

## TRACK PARTICIPANT PROGRESS DAILY

Vertex Case Manager allows for service time tracking and progress records to be entered, edited, and viewed within the system meaning no more manual record keeping nor the frustration of managing paperwork.

Our comprehensive tool empowers you to stay on top of each individual's progress and optimize your everyday tasks as a case manager.

## NEVER MISS ANOTHER DOCUMENT

The Case Manager module can provide your IDD organization with a simple and secure way to remain documentation compliant. It provides notifications when missing or incomplete documents are detected and a secure database with easy-to-use document storage and management.

This process ensures that you never misplace another document, allowing you to focus on serving your clients better.

## DETAILED REPORTING FOR GREATER VISIBILITY

Streamline your day-to-day operations with Case Manager's detailed reporting feature. Our platform allows for the generation of demographic reports and progress reports on a monthly, quarterly, or annual basis.

This will enable DSPs and case managers to review service and progress records, formalize results, and make data-driven decisions.

## STRESS-FREE USER EXPERIENCE

With Case Manager's user-friendly interface, you'll no longer have to deal with outdated systems and disjointed modules that cause frustration and delays.

Case Manager seamlessly integrates with other modules in the Vertex System, providing a unified platform for data management.

## CONTACT US
