4 CHALLENGES THE ARC FACES AND HOW VERTEX HELPS SOLVE THEM

Running programs that serve individuals with intellectual and developmental disabilities comes with unique challenges. From complex payroll to compliance demands, The Arc organizations need tools that simplify operations and free up time for what matters most—supporting people.

Complex Payroll & Billing

- Managing 14(c) subminimum wage payroll and billing is time-consuming.
- **Vertex automates the process** to ensure compliance and accuracy.

Disconnected Systems

- Using multiple systems for payroll, billing, and accounting creates inefficiencies.
- **Vertex integrates everything** into one connected platform.

Tracking Work & Activities

- Manual tracking of hours, pieces, and activities slows productivity.
- Vertex's Vocational Time Manager streamlines data entry and reporting.

Compliance & Reporting Pressures

- Government regulations and audits demand detailed, accurate records.
- Vertex provides built-in compliance tools and ready-to-go reporting.

Vertex helps The Arc overcome these challenges by connecting payroll, billing, and compliance in one seamless solution. The result? Less time on administration and more time advancing the mission of empowering individuals with disabilities.
