

4 CHALLENGES VERTEX SYSTEMS HELPS GOODWILL ORGANIZATIONS SOLVE

Goodwill organizations juggle complex programs, payroll, and reporting requirements every day. Vertex Systems simplifies these processes so staff can focus on people, not paperwork. Here are 4 items our team can help Goodwill solve.

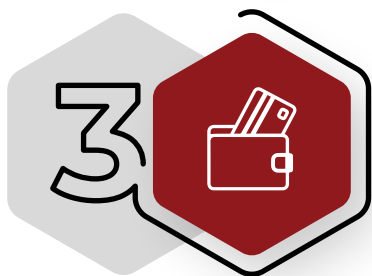

Tracking Hours & Production

Production environments move fast. Vertex captures time and piece counts accurately, validates entries at the source, and keeps data consistent from the floor to finance. The result: fewer corrections, cleaner audits, and less after-hours reconciliation.

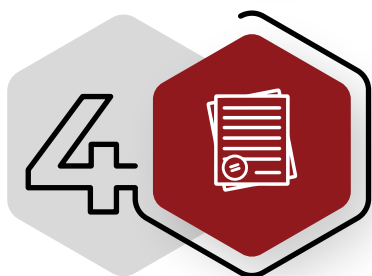

Getting Payroll Right

When every calculation matters, accuracy is critical. Vertex applies wage-calculation rules consistently and produces transparent, audit-ready records that show the “how” behind every paycheck. This builds confidence during reviews and reduces compliance risks. Vertex can process payroll and also can track 14(c).

Simplifying Billing

Whether billing by service type, program, or funding source, Billing Manager centralizes and standardizes the process. Organizations see faster cycles, cleaner invoices, and fewer write-offs due to errors.

Connecting Program Data to Finance

With Vertex, approved payroll and billing data flow directly into Microsoft Dynamics 365 Business Central in one click, shortening month-end, strengthening reporting, and tightening operational alignment.

Vertex helps Goodwill organizations spend less time on administration and more time on mission-driven work. By streamlining production tracking, payroll, billing, and finance integration, we ensure your operations run smoothly from start to finish. Connect with our team to learn more!
